

## CommuniPrep Usability Testing

### List of tasks

#### TASK 1

*You recently received a job offer for a Software Engineer position, and you want to be prepared. Try to do an Interview Simulation and answer the first question.*

#### TASK 2

*While answering the second question, you appear nervous as you frequently touch your hair and use filler words. Monitor the feedback provided and refine your response with better words and more confident language.*

*You can use this words:*

*FILLER WORDS (Probably, Basically, Stuff, Like)*

*BETTER WORDS (Achieved, Resolved, Managed, Learned, Supported)*

#### 1. How useful did you find seeing yourself on the webcam?

|                       |                       |                       |                       |                       |                       |                                  |
|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|----------------------------------|
| 1 (Very Useless)      | 2                     | 3                     | 4                     | 5                     | 6                     | 7 (Very Useful)                  |
| <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> |

#### 2. How useful did you find seeing feedback in real-time?

|                       |                       |                       |                       |                                  |                       |                       |
|-----------------------|-----------------------|-----------------------|-----------------------|----------------------------------|-----------------------|-----------------------|
| 1 (Very Useless)      | 2                     | 3                     | 4                     | 5                                | 6                     | 7 (Very Useful)       |
| <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> |

#### 3. Overall, this task was:

|                       |                       |                       |                       |                       |                                  |                       |
|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|----------------------------------|-----------------------|
| 1 (Very difficult)    | 2                     | 3                     | 4                     | 5                     | 6                                | 7 (Very easy)         |
| <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> |

### **TASK 3**

*Try to complete the interview and see your final results.*

---

### **TASK 4**

*You want to try another simulation with more than 4 questions and with a more advanced level. Find a way to customize your Interview.*

---

### **TASK 5**

*During the interview session, you realize your PC battery is low and you may not be able to finish all the questions. Try to find a way to not lose your progress, before leaving.*

---

### **TASK 6**

*You left an interview without answering all the questions. Find that interview and complete it from where you left off.*

---

### **TASK 7**

*Check the results from one of your previous interviews*

---

### **TASK 8**

*You recently had a real job interview and you want to share your experience with other people. Find out a way to provide one of the questions to the system.*

---

### **TASK 9**

*You found out one of the questions that you added before has some grammatical errors and you want to update it.*
